

Recovery Package Content (Guardians)

- BLACK envelope: Seeds (Highly confidential)

NEVER share with anyone but the owner and the heir
NEVER take a picture of them
NEVER load on any internet-connected device

ALWAYS keep protected and secure
ALWAYS keep offline and disconnected from the internet

- ORANGE envelope: Wallet Descriptor (Semi-Public)

Must be loaded into an internet-connected device such as a phone or computer in order to get access to the Bitcoin wallet information such as receiving addresses, transactions and balances

Anyone that has access to the Wallet Descriptor can know private information about the wallet, such as total balance, but can't spend from the wallet

Only share with the owner and the heirs

- VIOLET envelope: Offline signing device (Not sensitive)

No risk of information leak as long as the device is not loaded with the Signing Keys.
